London Tower Bridge

London's Tower Bridge is one of the most famous bridges in the world.

The bridge was designed by Horace Jones in collaboration with John Wolfe Barry. Nearly 450 workers were involved in the construction of the 265 meter long bridge. It took 11,000 tons of steel to build the framework. At the time many people disliked its Victorian Gothic design, but over time the bridge became one of London's most famous symbols.

Taking photographs of the Tower bridge is a favorite London tourist activity, but you can also go inside the bridge, where you'll have a magnificent view over London from the walkway between the two bridge towers.
